

weather stations multi-functional instruments

digital weather station

This compact weather station displays the indoor and outdoor temperature (-20 to +60°C), humidity (% RH), barometric weather forecast (symbols), date, real time, dual alarms and a snooze function. The unit is supplied with one outdoor temperature and humidity sensor (one additional sensor can be used - optional extra).

The sensor transmits the data via RF signals and can be placed up to 30 metres (100 feet) away in an open area. The weather station also displays the moon cycle, max, min and trend indicator for temperature and humidity (in and out). Dimensions 28 x 115 x 128mm.
